

Dear Mr Winn

Thank you for email and attached letter outlining Science & Technology Australia's 2025 Federal Election priorities.

Andrew believes in the critical role of the science and technology sector in Australia. He is agrees with the 4 priority areas and 15 actions identified in your priority document, and should he be re-elected will look for opportunities to support and advocate for them in the next Parliament.

Of particular interest to Andrew is the focus on long-term, secure investment in research, something Andrew has long argued is missing in our national approach to science and technology.

Yours sincerely

[Office of Andrew Wilkie MP](#)
